Award citation of the EISA Jury:

EUROPEAN HOME THEATER RECEIVER 2007-2008 Onkyo TX-SR605

Onkyo's TX-SR605 is a very talented performer. It's the first AV Receiver to include HDMI 1.3, and offer decoding of new sound formats such as DTS-HD and Dolby True HD. But it's also a powerful home cinema amplifier that provides a true 7.1-channel output, compatibility with 1080p and Deep Color (xvYCC) video signals, as well as Faroudja de-interlacing. The built-in Audyssey 2EQ enables swift and easy automatic calibration in any room, but what's really amazing is the extremely competitive price. The Onkyo is a superb future-proof buy for the true enthusiast and the more cost-conscious consumer alike.
